negative. just like any magnetic pickup type sensor it should be very close but not touching. im not looking at the manual but this guy says its supposed to be between .025 and .030 inches. if the gap is too big you'll have starting/performance issues. if there is no gap the cam gear will chew up your new sensor and still not start, and may introduce cam sensor debris into your motor.

DT 466 cam sensor replacement - School Bus Fleet Magazine ...

I have a 2004 4300 international dt466 it cranks but no start. I have changed all sensors still nothing check fuel pressure injector orings im stuck. Engine position sensor shows up when u put computer on it. Where should I check for a broken wire maybe? Plug to sensor has power and sensor is good.

2004 4300 International DT466 cranks but won't start

OK cleared codes & installed new crank sensor . Truck ran ok for little while now back to same stalling problem. Engine load all over the place @ idle 35% - 55% , put in gear eng load increases then stalls. Check engine light came on injector control prassure & brake light. ICP @ idle 5.55 MPa , bring up to 1200rpm 6.8 MPa & up .

I am working on a 2005 IH 4300 w/DT466, also having ...

We have an 04 DT466 that "hiccups" or "skips a beat" occasionally while out on a route. We have changed the fuel filter and cleaned the "rock catcher". We have also changed the camshaft position sensor and inspected wiring and connections in the area of the starter.

2004 DT466..."Hiccups" - School Bus Fleet Magazine Forums

The DT466E Diesel Engine Memories The DT466E International diesel is no more mainly because it could not meet emission standards. It's one engine that performed only as good as the oil pressure that supplied the HEUI (hydraulic electronic unit injectors). They had a tendency to run rough when cold because of the lack of supply to the HEUI system which ran on thousands of pounds of oil pressure.
