Semantic Structures is a large-scale study of conceptual structure and its lexical and syntactic expression in English that builds on the system of Conceptual Semantics described in Ray Jackendoff's earlier books Semantics and Cognition and Consciousness and the Computational Mind. Jackendoff summarizes the relevant arguments in his two previous books, setting out the basic parameters for the formalization of meaning, and comparing his mentalistic approach with Fodor's Language of Thought ...

A. Becks, J.-C. Toebermann, in Computer Aided Chemical Engineering, 2002. 2 Document Maps and the DOCMINER System. Document Maps present the semantic structure of a document collection by using a suitable metaphor for intuitively visualizing 'document similarity'. The concept of document or group similarity is usually reflected by a notion of distance: the more similar two documents or ...

Formalization plays an important role in semantics. Doing semantics and following the literature requires considerable technical sophistication and acquaintance with quite advanced mathematical techniques and structures. But semantics isn't mathematics. These techniques and structures are tools that help us build semantic theories.

Semantics (from Ancient Greek: σημαντικός sēmantikós, "significant") is the linguistic and philosophical study of meaning in language, programming languages, formal logic, and semiotics. It is concerned with the relationship between signifiers—like words, phrases, signs, and symbols—and what they stand for in reality, their denotation. In the international scientific vocabulary ...
