Applied Network Defense

This policy addresses a fundamental change in network security strategy and brings the CWRU campus network to a layered defense posture. Network attacks from off campus sources have increased to a level of persistence and severity where even basic IT infrastructure has been successfully targeted.

II-6 Network Defense Policy | University Technology, [U ...

Deception is a term more commonly associated with network attack than network defense, but, as this chapter presents, several network security controls depend on the adversaries being deceived. Deception is a useful strategy for the defenders of network security since it offers opportunities to distract the adversary away from protected information, misinform the adversary as to the success of the attack, and disrupt the utility of the attack by corrupting the information resulting from it.
